

Audio Archery for your Ears

<https://itunes.apple.com/us/app/audio-archery-archery-for/id531019563?mt=8>

This App provides audio feedback on how to operate the game. VoiceOver must be turned off to play. Utilizing earphones will help you auditorally determine where the target is located. Use this App to practice iOS gestures such as a tap, drag, and a flick down. This game uses similar gestures as VO Tutorial Basketball. Listen to the target and once it sounds like it is in the middle, flick down to shoot your arrow. This games has some great sound feedback to motivate students to continue to play.

Description

Audio archery brings archery to iOS. Use only your ears and your reflexes to shoot targets. The game is entirely auditory, so there are no pictures or icons. You will hear a target move from left to right. When it is centered, flick down on the screen with one finger to pull back your bow. Release your finger to fire your arrow.

The game consists of 10 rounds with 7 shots each. Your goal is to meet or exceed the minimum score given to pass to the next round. Can you pass the tenth round and become the audio archery champion?
